

Super Degrease+ Multi Purpose Cleaner

- **Simplifies cleaning** by replacing many different types of cleaning products being used throughout the facility.
- **Safe to use** on virtually all cleaning surfaces both inside and outside.
- The only all purpose cleaner/multipurpose cleaner that is **certified by both the National Sanitation Foundation & The Green Clean Institute.**
- **Non-toxic formula is safe** for employees and customers.
- Powder form for economical shipping anywhere in the world

Super Degrease+ Multi Purpose Cleaner has a distinct advantage over many of the cleaners in the market:

Unique cleaning action sets it apart.

The cleaning action is UNIQUE and can be related to the reaction of the atom in an atomic explosion, wherein the ceaseless random movements of the atoms taking place, **actually lifts, separates, and holds in separation, the oils, grease, dirt, soils, etc** which have been penetrated by the colloidal cleaner. Regular all purpose cleaners do not have this action.

Super Degrease+ Multi Purpose Cleaner **continues to work as long as there is moisture to work with**—whether it is fresh water, salt water, combined with other solvents or alone. Other cleaners can not make these claims.

Super-Wet technology used to clean up oil slicks on oceans

The properties of colloids were first documented in the search to find a biodegradable substance that would break up oil slicks on oceans. We have actually performed some limited testing in this area with surprising results. Through research as to why such products could break up grease and oil and hold them in separation, it was learned that colloids have minute particles, called micelles that, when combined with water, break the surface tension to make water "super-wet." That same action allows the micelles to penetrate grease, oil, and dirt and hold them in suspension in the "super-wet" water; in effect making them dissolve in water.

Super Degrease+ Multi Purpose Cleaner and Degreaser

Why you need it (what it does)

- Patented formulation actively absorbs and lifts grease, oil and dirt
- Biodegradable, NSF approved
- Unique, penetrating action without corrosive effects
- Easily adapted to any equipment

Used around the world in mechanics shops, production environments, factory floors, Mechanics won't know how they lived without it.

"I don't get excited about much, but the first time I used Super Degrease+ after working with filthy engine parts all day, I was amazed at how this cleaned up my hands. I've never seen anything like it.."

- repair shop mechanic
